

DSC-TX9/R

Photographic brilliance meets styling designelegance in the Sony's DSC-TX9. Capture impressive landscapes with iSweep Panorama and in 3D.¹⁰ and Get clear and crisp images in low light thanks to Sony's "Exmor R" CMOS sensor. You'll also Bbe impressed by Superior Auto, Background Defocus and Full HD 1080/60i AVCHD movies.⁸ Enjoy it all on an easy to view 3.5" touch screen¹.

AVCHD

- **3D Sweep Panorama**
Capture vast scenic vistas and 16:9 shots in spectacular 3D. As you sweep across the panorama, the camera records separate right-eye and left-eye images that make landscapes come alive on your 3D television.⁸
- **Intelligent Sweep Panorama Mode**
Capture expansive landscapes with Intelligent Sweep Panorama Mode. Press shutter and sweep and the camera does the rest, continuously, shooting images and in one second stitching them together. This model even detects faces and moving subjects to stitch intelligently different widths to help avoid subject distortion.
- **12.2 Megapixel Back-illuminated "Exmor R" CMOS Image Sensor**
The DSC-TX9 features a 12.2 megapixel "Exmor R" CMOS image sensor that brings out the full resolving power of the camera's Carl Zeiss® Vario-Tessar® lens to deliver extremely fast speed, high resolution, and stunning low-light sensitivity with improved image clarity and drastically reduced grain. In addition, the combined "Exmor R" CMOS sensor and BIONZ™ image processor delivers extremely fast 10fps, Anti Motion Blur, Hand-held Twilight and 1080i movie modes⁹.
- **1080i AVCHD Movie Mode⁸**
Record movies in 1080i AVCHD /MP4 high definition at 60i⁸. With HDMI connectivity you may enjoy instant playback on compatible HDTV or LCD of the camera. The AVCHD format captures a high degree of detail and smooth movement, and when footage is burned to disc, can be played back on Blu-ray Disc™ players, Sony® PlayStation® 3 systems and compatible PCs and HDTVs.⁷ The convenience Movie start/stop icon makes it easy to access this mode via dedicated movie start/stop button.
- **3.5" Xtra Fine LCD™ touch screen display**
A large 3.5" Xtra Fine LCD™ touch screen display1 w/TruBlack™ technology (921K pixels), the largest of Sony's Cyber-shot DSC line makes it easy for viewing and sharing images with simple and fun touch screen operation. With its Ultra AR film coating, which reduces reflections and increases contrast and brightness, viewing images on the LCD even in bright light is possible.
- **Superior Auto mode**
Get cleaner, more dynamic pictures and fewer missed shots. The camera automatically recognizes the correct scene mode, then quickly shoots and combines up to six shots to produce images with greater clarity, optimum dynamic range using backlight correction HDR technology and lower image noise using 6 shots layering technology.
- **Background Defocus**
DSLR photographs are often beautiful because they blur the background, putting the emphasis on your subject. Now our point-and-shoot cameras can deliver this signature DSLR benefit. The system takes two shots, identifies the background and applies a defocused background while keeping your subject crisp and clear.
- **High speed shooting**
The DSC-TX9 can capture full 10.2 megapixel resolution images at up to 10 frames per second, helping to ensure that you capture the decisive moment such as the soccer ball flying into the goal. In addition, the DSC-TX9 employs a mechanical shutter that helps reduce distortion when continuously shooting moving subjects.
- **Carl Zeiss® Vario-Tessar® Lens with 25mm equivalent wide 4x Optical Zoom**
The high-performance Carl Zeiss® Vario-Tessar® 4x optical zoom lens brings distant subjects closer for video recording as well as for outdoor, sports, and travel photos, and Close Focus shoots close-ups up to just under 1/2" from the subject. A wide angle of 25mm equivalent wide-angle lens allows you to take wider shots of the scene or group in crowded spaces.
- **HDMI™ output**
The High-Definition Multimedia Interface (HDMI™) is a compact audio/video connector interface for transmitting uncompressed digital streams. HDMI connects digital audio/video sources such as a compatible camcorder, Blu-ray Disc™ player, a personal computer, a video game console, or an AV receiver to a compatible digital audio device and/or video monitor such as a digital television (DTV).
